

CHCA National Mentoring Program

In the first two years there have been strong mentor mentee relationships to help guide the mentee (or protégé) in the start of their careers. Participation in program events have varied over the years but there has been improvement in several areas. The

Program Results

Introduction

Now in its third year, ACHCA's National Mentoring program is working to build strong leaders through the connection of mentors and protegies in the field of long term care. In 2008 efforts began to create Fellows that would be mentors to young or soon to be administrators and in 2011 a grant commitment from Life Care Centers of America was rea eived. A framework for the program was set up and the ACHCA Mentoring Program was established.

The first cohort of the National Mentoring Program was chosen The first cohort of the National Mentoring Program was chosen and paired up in 2012. The group was then introduced at the annual Convocation in Nashville that year. Each year the new mentoring class is introduced at that years convocation. To date, there have been three cohorts including the initial with the current cohort (2013) coming up on the year marker of their relationship. The third cohort (2014) will be introduced at the 48^o annual Convocation in Las Vegas.

Program Approaches

The ACHCA mentoring committee matches mentors and mentees based on a profile that they fill out. Requirements have been set to ensure mentors are eligible; that they have the time to commit to the program, are knowledgeable in their field, and are participating voluntarily. Once matched up the mentor and mentee pairs each complete a state of the art Learning course focused on mentoring relationships based on Chip Bell's SAGE model.

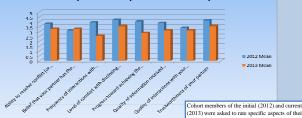

In order to solidify the relationship they then complete educational sessions. Only a few matches are within close distance of each other, so ACHCA supports a mentoring distance community and technology resources. The program financially supported eleven protégés in the 2012 cohort and three in the 2013 cohort.

The requirements of the fellows and protégé's are listed below. A fellow is seen as one of the highest recognized roles of an ACHCA member, and are deemed qualified to become the mentors to administrators (protégés) early in their careers.

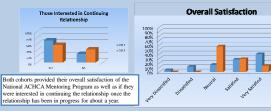

(2013) were asked to rate specific aspects of their relationship on a scale of 0 (very dissatisfied) to 5 (very satisfied) after almost a year.

2012

2013

A very important measurement in the program is the perceived change in reported skills. The mentors and protégés first assess their own management and leadership administrative skills in 17 different areas. They then assess the same set of skills in relation to their colleagues. Then we can measure the amount of change from the beginning of the mentoring relationship to the end for both years separately and then compare the change in both cohorts. The 2012-13 cohort experienced 5% and 10% increases while the 2013 cohort reported 25% and 36% increases in the perception of their skill sets.

Overall, the program is showing improvement for mentoring relationships. In the satisfaction in aspects of the relationship the greatest achievements came from progress toward achieving the goals the pairs agreed to at the beginning of the relationship, ability to resolve conflict (or overcome any barriers) encountered in the relationship, and trustworthiness of each other.

Discussion

AVON

From the data we know that there is a high degree of comfort level and trust in ACHCA mentoring relationships. However, a recurring problem that has come up in the evaluations from the comments sections of mentors and menteres is not being able to meet face to face. It has been shown in the first two years that geographic proximity of the pair does in fact make a difference. It is still possible to keep up the relationship with a distance barrier but the cohorts have expressed frustration in getting good, qualify information from each other and being able to set saide time to meet. There is a need for a move to a state and/or district program.

it work with technology. I would recommend pairing folks in the future close in geographical area if .

æ

Greatness

Guiding

We also experienced some staff and responsibility transitions, which may have impacted the communication and support, and ultimately the engagement of the current cohord group. This is being addressed by the subcommittee and ACHCA leadership.

Conclusion and Recommendations

A state/district program is in the process of being implemented. The applicants to the program would be able to enroll and begin the program at either the state, district, or national level. Instead of the only starting point for the program being at Convocation there would be entry points at state conferences with scheduled mentor/protégé training session. In the state programs the members would be required to attend at least one national onference within a two year period

The requirements of the mentors and protégés as well as the matching process would stay the same in the state programs as it was in the national. Educational seminars at the state or national level are required by the matched pairs and each state that participates in this program would have one representative on the subcommittee

The program is excited to launch three pilots this upcoming year in The program is exact to launch mee pross this upcoming year in New Jersey (District 2), Ohio (District 3) and Georgia (District 4). This is based on their initial inquiry, level of interest, number of fellows, potential protégés', identification of a peer trainer(s), geography and the availability of some matching funds. In order to geography and the availability of some matching functs. In order to have the best representation of education a train the trainer model is being implemented. This will ensure faculty resources are available in every initial site, along with future prospective states.

BACKGROUND

Aging services faces an employment cliff. The field is experiencing approximately 40% level of turnover reported in numerous studies and research demonstrates a strong connection between satisfaction and turnover. The looming crisis of availability of good administrators has the potential to negatively impact care and service to our senior population. The National Emerging Leadership Summit (NELS) for Healthcare Administrators in Aging Services are reaching out to this emerging leadership population to hear their "voice" and help drive an agenda that encourages a more positive career outlook for this field.

NELS is a conference held at The George Washington University in Washington, D.C. NELS provides an opportunity to hear from Generation X and Generation Y leaders in the aging services field. This year will be the National Emerging Leadership Summit's fifth year engaging with professionals from across the country.

PURPOSE OF SUMMIT

- 1. Strategize: Collaborate with other generation X and Y leaders in the post-acute and long term care and support services field and develop strategies on how to increase, improve and support the value of the profession for executives to attract talent.
- Advocate: Learn about the regulatory and legislative issues facing the profession and how to support innovate change. Professionals Leading Passionate Innovation Engage with fellow emerging leaders in an unrivaled opportunity to strategies. advocate, connect and innovate the future of the health care as aging services administration profession.
- 3. Connect: Unite with fellow generation X and Y leaders. Network with key leaders of NAB, ACHCA, AHCA, LeadingAge, and the US Senate Special Committee on Aging.
- 4. Innovate: Gain knowledge on how to effectively lead your organization and the profession through shared learning experiences.

A survey is sent to attendees before each Summit to gain insight on their personal and professional backgrounds. The Summit combines current best-practices with a facilitated dialogue to provide a new perspective for participants and the broader field. The action plans and recommendations that the attendees develop at the summit focus on improving the quality of the administrative profession in aging service

A follow-up survey is also sent to check the progress attendees had made on the topics discussed at the NELS.

Fremdattise of the NAB National Association Strengtheorem

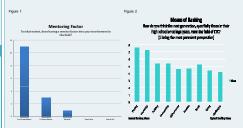

golden

The results of the survey were promising because more than 50% of the attendees have made progress on the recommendations and action plans. The survey inquired the NELS attendees on factors (demographics. work experience, work preference, etc.) affecting the quality of current and future aging services:

FINDINGS

 The attendees think it is important to a great extent of having a mentor in the field. 88% of attendees have one or more mentors in the LTC field. (Fig. 1)

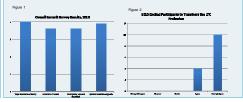

•Overall, they reported the next generation of workers perceives the field of aging services as challenging, caring and noble. (Fig. 2)

The 2013 Post-Summit quality assessment found the following:

 Overall, they reported that the topics were relevant and timely during the Summit, the speaker was knowledgeable, ideas were practical and the presentation was well organized (Fig. 1)

•Many participants were influenced by the Summit and it excited them to transform the long-term care profession (Fig. 2)

2013 SUMMIT FINDING

- 1. Improving the public perception and image of the LTC administrator profession by developing a more accurate message of the field and determine other outlets to promote this message.
- 2. Describe the work being done by the Summit participants and outline them in an authoritative report or white paper. 3. Ensuring the accountability of NELS participants and
- committees through the use of technology by implementing a multimedia platform like basecamp to allow for greater communication between NELS participants. Reduce the barriers for entry into the LTC administrator
- 4. profession, including advancing standardized licensure requirements and reciprocity agreements.
- 5 Recruiting and retaining future leaders who are talented and dedicated to excellence in leadership and continuing the positive transformation of the LTC administrator profession.
